Full-stack software engineer and Georgia Tech M.S. student leading two production systems at Marucci Sports. Experience shipping business applications, cloud infrastructure, and developer tools.

EXPERIENCE

Marucci Sports | Full-Stack Web Developer — Aug 2025 - Present

- Lead full-stack development of warranty and manufacturing systems, supporting 3K+ monthly warranty users and contributing to e-commerce serving 30K+ annual shoppers
- Build Angular/NestJS applications with TypeScript, PostgreSQL, SQL Server, and AWS, using AI-assisted implementation, debugging, refactoring, and documentation workflows
- Completed 108 estimated development tickets at 4x the peer average (Jan-Nov 2026)
- Revamped shipping and packaging logic with quantity caps and item grouping, generating ~$75K in additional monthly shipping revenue
- Hardened e-commerce and admin platform security across API access controls, authentication, secure account links, and SQL handling
- Improved production-line system performance, reliability, and availability, plus warranty UI/UX and cross-system export/sync consistency
- Developing a Klaviyo email migration with updated transactional templates, marketing opt-ins, and customer-facing UX

Louisiana Office of Technology Services | Software Developer Intern — Jan 2024 - May 2025

- Developed full-stack MVC web applications and REST APIs in C#, JavaScript, and .NET alongside a full course load
- Built GitHub Actions CI/CD with TypeScript/Cypress E2E tests, raising coverage from 0% to ~85%

Deloitte Consulting | Solutions Engineer Intern — Jun 2024 - Jul 2024

- Optimized SQL queries in a Java/Spring Boot IVR REST API, improving data retrieval efficiency by ~200%
- Built a Python/Streamlit generative AI prototype that turned meeting summaries into RFP PDFs and PowerPoints, reducing preparation from over an hour to under two minutes

We Greaux People | Software Developer Intern — Sep 2023 - Nov 2023

- Contributed to a Flutter frontend and wrote Dart unit, integration, and widget tests, increasing coverage from ~25% to ~75%

McIlhenny Company / Tabasco | Software Analyst Intern — May 2023 - Jul 2023

- Automated concurrent request reports with KSH scripts and SQL on AIX UNIX, saving 30-50 hours monthly

EDUCATION

Georgia Tech | M.S. Computer Science, AI specialization | GPA: 4.0 — Expected May 2028
Louisiana State University | B.S. Computer Science, Mathematics minor | GPA: 3.6 — May 2025

PROJECTS

CloudGateway | VPN and cloud deployment platform | About

- Built a multi-region WireGuard service with a React dashboard, native Swift iOS/macOS clients, and CLI, backed by FastAPI, Firebase authentication, and Terraform-managed OCI infrastructure
- Created CloudLaunch, the original AWS deployment platform, automating regional networking, AMI distribution, EC2 provisioning, and resource cleanup through Python and Lambda

StreamTrack | Movie and TV discovery app | App Store

- Shipped a TypeScript rewrite of the React Native app on the App Store and built its C#/.NET API and AWS Lambda pipeline for streaming availability, discovery, and watchlists

AI and Developer Tools

- Published t3-thread and codex-thread CLIs with agent skills for conversation retrieval, plus t3-profile for separate account authentication and shared configuration
- Built br0wser for persistent Chrome sessions and CodeLaunch for automated remote development setup
- Maintained a VS Code Debugger MCP extension fork, updating MCP transports and client configuration and fixing agent debugging workflows

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, Python, Swift, Java, SQL, Shell
Frameworks: React, React Native, Angular/AngularJS, NestJS, .NET, Spring Boot, Flutter
Cloud and data: AWS, Oracle Cloud, Google Cloud, Firebase, Terraform, PostgreSQL, SQL Server
Tools: Claude/Codex, Git, GitHub Actions, Cypress, Postman, Swagger, MCP, Agile/Scrum, DevOps
